THE EPA'S RENOVATION, REPAIR, AND PAINTING (RRP) RULE AFFECTS YOU!

EPA Renovation, Repair & Painting (RRP) Rule

The Renovation, Repair, and Painting (RRP) Rule affects contractors, property managers, and others who disturb more than 6 square feet of interior or 20 square feet of exterior known or presumed lead-based paint.

This strict new rule covers any work performed for pay, including painting and remodeling, that results in the disturbance of painted surfaces in pre-1978 homes and child-occupied facilities. Examples include removal or modification of painted components such as doors; repairing a painted surface or preparing it for repainting by sanding, scraping, or by performing any action that may generate paint

dust; removal of walls, ceilings, and other structures; re-plastering; re-plumbing; weatherization work that disturbs painted surfaces; and all window replacement. Training, certification, and work practice requirements in the RRP Rule are effective on APRIL 22, 2010.

By this date, firms must have one or more "Certified Renovators" assigned to jobs where lead-based paint is disturbed. To become certified, a renovator must successfully complete an EPA training course conducted by an EPA accredited training provider. The National Center for Healthy Housing is an approved trainer.

SIGN UP NOW BEFORE CLASSES FILL UP!

EnviroEd, LLC is partnering with the National Center for Healthy Housing, an EPA-accredited training provider, to bring the Certified Renovator classes to Northeastern Pennsylvania.

Classes will include both lecture and hands-on activities as well as a certification exam.

Classes are limited to approximately 20 individuals. A minimum of 12 individuals are needed to hold a class.
